Our 5 Core Modules (16 In-Depth Sessions)

Industry Aligned

Practically
Oriented

No-Code
Focused

Career-Ready Skills

MODULE 1: Understanding AI Agents (The Concepts)

SESSIONS 1-2

Foundations of AI, LLMs,
Agentic Thinking

SESSIONS 3

Agent Planning & Decision
Making, Workflow Design

MODULE 2: The No-Code Agent Builder's Toolkit

SESSIONS 4

Mastering No-Code
Platforms

SESSIONS 5

Equipping Agents with "Memory"
(Variables, Sheets, RAG basics)

SESSIONS 6

Connecting Agents (APIs for
Gmail, Slack, Web Search)

SESSIONS 7

Prompting for Agent Control
in No-Code Tools

MODULE 3: Building Your First No-Code Agents (Hands-On Labs)

SESSIONS 8

Lab - Workflow
Automation Agent

SESSIONS 9

Lab - Information Gathering
Agent

SESSIONS 10

Lab - Task Management
Assistant

SESSIONS 11

Lab - Conversational AI
Agents (Chatbots)

These advanced modules provide students with the opportunity to apply their AI skills to larger, more complex projects with real-world impact.

MODULE 4: Testing, Refining, and Responsible Use

SESSIONS 12-13

Agent Reliability, Testing, Error Handling

SESSIONS 14

Understanding Limitations of No-Code Tools

SESSIONS 15

Ethical AI in Practice (Bias, Privacy, Deployment)

Electives module

MODULE 5: Capstone Project – Showcase Your AI Prowess!

SESSIONS 15

Design & Demonstrate

20+

Lab Sessions

5+

Practical Agent Builds

100%

Industry-Relevant

Key Program Features

Project-Based Learning

- Each module leads to practical use, ending in a Capstone Project.

No-Code Approach

- Focus on using AI tools effectively for agent building, no complex coding required.

Empowering Outcomes

- Build real-world AI agents with clear concepts and practical skills.
